

# Threat detection for your web applications

HAWKEYE is the most advanced threat detection and management platform available, a platform that can integrate and engage directly with your applications to locate real threats in real-time. **Your applications will now be enabled to detect the most complex threats** hitting systems around the world. HAWKEYE provides a unique proposition that allows customers the flexibility to employ highly effective services on the Pay-as-you-Go model.

## When the application says “Attack” -- It’s a Gospel Truth

### **</> Application Engagement**

**Get under the hood, know your application**

- Integrate your applications with the threat management system using detection libraries
- In depth application training is a part of the deal
- Detection strategies will be designed by the professional services team involved

### **🎯 Detection Accuracy**

**Hitting the Bull’s Eye every time**

- Detection accuracy by apps shoots up by 80%
- Attack classification is more granular
- Detection time in most cases is reduced to half

### **🛡️ Threat Intelligence**

**If it has been seen before, you will know**

- App intelligence is generated from statistical analysis of historical attack trends
- Threat data is used for real-time decision making
- App attacks are repeated every 134 hrs

### **🔍 Measurable Security**

**The value in knowing how many you can detect**

- 53% of app attacks can’t be reliably detected outside the application code base
- Professional services give you a coverage sheet for threats that can be detected or otherwise

### **🗨️ Intuitive Console**

**Visibility becomes a reality, uncomplicated analysis**

- The CARD console provides the close air support required for threat analysis
- Statistical analysis tools are a part of the base
- Includes a threat management workflow

### **💰 Pay-as-you-Go**

**You can engage without a pile of cash**

- All deployments happen without huge upfront payment
- Support is free, so is incident handling
- Upgrades are free, advisories are free
- Use the service if you like, discontinue anytime if you so wish, without bleeding
